

SAVE RALPH

CARROT PAPER

SAVE RALPH CARROT PAPER:

PROJECTS CREATED WITH A SOLID FOUNDATION OF COMMUNITY IS A VITAL PART TO SHAPE THE CRYPTO FUTURE AS WE MOVE FURTHER AWAY FROM RIGID FINANCIAL STRUCTURES AND TRADITIONAL MINDSETS, WE BECOME FREE TO DISCOVER NEW WAYS TO SOLVE PROBLEMS AND RELATE TO ONE ANOTHER.

COMMUNITY-RUN PROJECTS ARE MORE THAN JUST A CHANGE OF PACE, THEY ARE AWAY TO PRACTICE THE RADICAL ACCEPTANCE OF OTHERS. A COMMUNITY IS HELD TOGETHER BY HUNDREDS, IF NOT THOUSANDS, OF INTERCONNECTED MOMENTS.

WE REALIZED THAT TRUE STRENGTH DOES NOT COME FROM ONE OF US ALONE, IT COMES FROM WHEN WE WORK TOGETHER IN HARMONY.

WE ARE DRIVEN BY THE WILL TO GIVE OUR COMMUNITY THE POWER TO INFLUENCE DECISIONS AND INCENTIVIZE ACTIVE PARTICIPATION, WE ARE LAUNCHING OUR OWN SAVE RALPH ECOSYSTEM. THIS NEW PROJECT-MANAGEMENT MODEL HAS PROVEN TO BE EFFICIENT WITHIN DEFİ INDUSTRY, AND WE'RE EXCITED TO LAUNCH THE FIRST GOVERNANCE TOKEN IN THE NFT SPACE RALPH TOKEN.

SAVE RALPH TOKEN IS A DEFLATIONARY TOKEN, WILL BE SECURED WITH A BASKET OF 3 CRYPTOCURRENCIES THAT WILL COVER THE TOKEN VALUE. THE SECURITY THUS ADOPTED IS INTENDED TO GUARANTEE A CONSTANT AND STABLE INCREASE IN THE VALUE OF THE TOKENS.

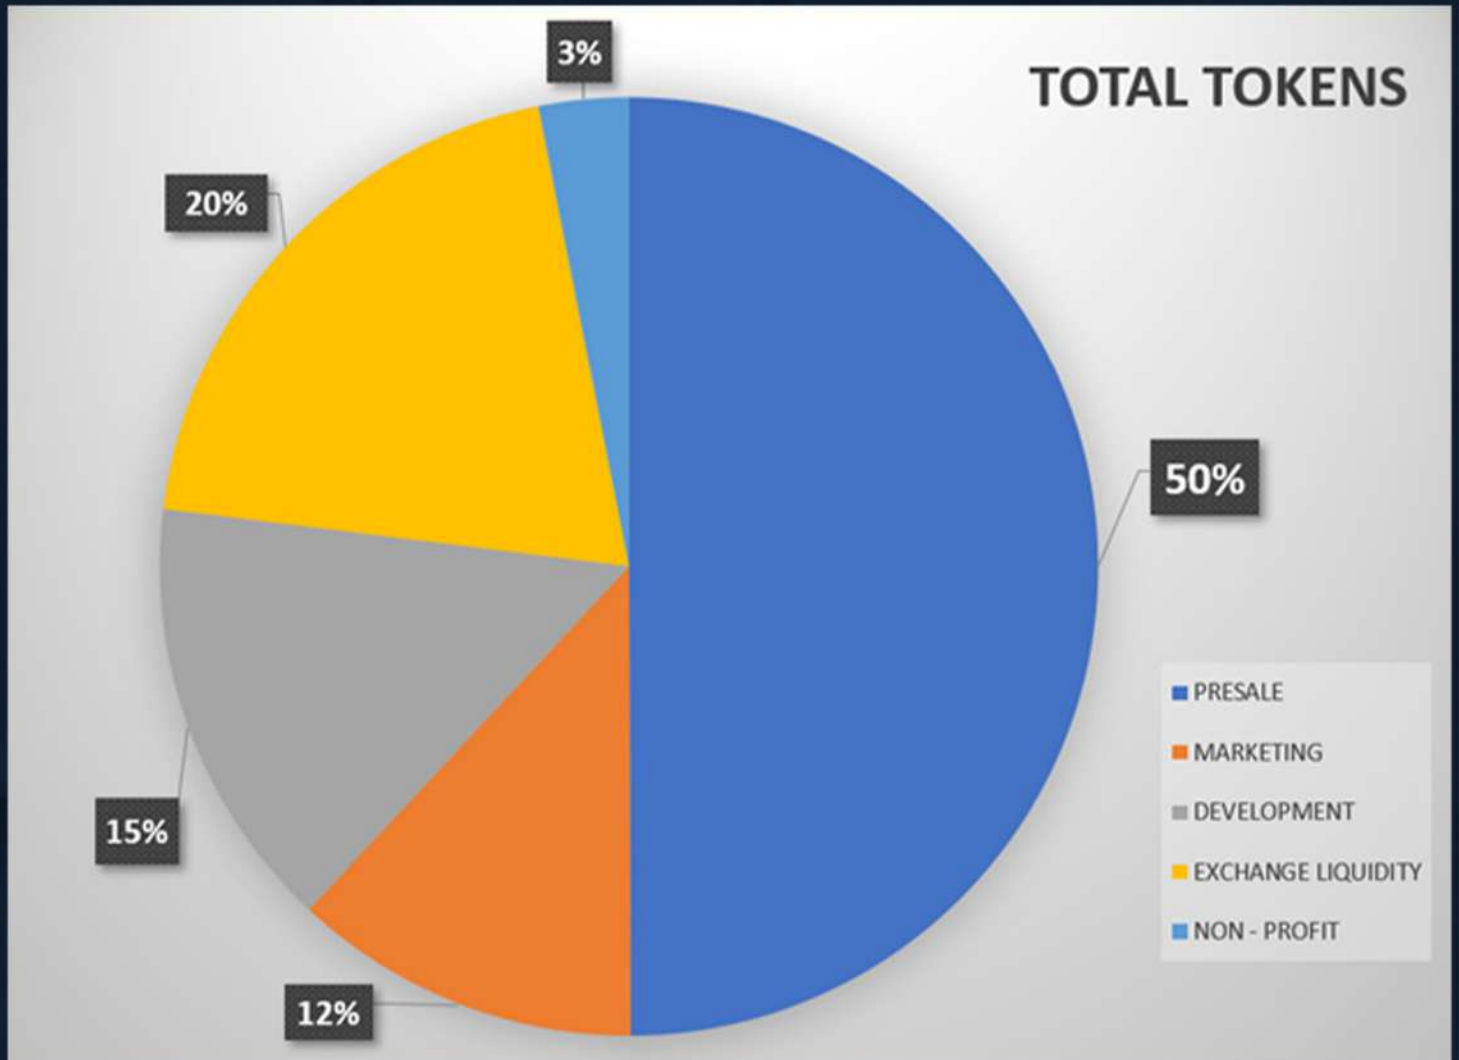

THANKS TO THE CORRECT MATCHING OF COINS, THEIR VALUE IS LESS SUSCEPTIBLE TO FLUCTUATIONS THAT APPEAR IN THE CRYPTOCURRENCY MARKET, THE SAVE RALPH TOKEN SECURITY GRAPH WILL LOOK LIKE THIS:

- USDT: RESPONSIBLE FOR 33% OF THE VALUE OF THE CURRENCY.
- BUSD: RESPONSIBLE FOR 33% OF THE VALUE OF THE CURRENCY.
- BNB: RESPONSIBLE FOR 34% OF THE VALUE OF THE COIN.

ALL LISTED CRYPTOCURRENCIES THAT MAKE UP THE PLAN WILL BE USED TO GENERATE ADDITIONAL EARNINGS ON THE RALPHSWAP PLATFORM.

DISTRIBUTION:

WHAT IS SAVE RALPH ECOSYSTEM:

RALPHSWAP:

A trading pair matching system that allows people to place orders and trade cryptocurrencies without relying on an intermediary institution to manage the ledger and hold customers' funds. Instead, trades occur directly between users (peer to peer) through an automated process.

Ralph Swap is the first coin exchange using the Automated Market Maker (AMM) system that allows any combination of two meme coin themed tokens to be exchanged on the Binance Smart Chain Network; the Ralph tokens will be used to make investments in the swap, different users will be able to create their NFT tokens and present them on the exchange and set a price in any currency already set by the system.

The RalphSwap will also offer a variety of services that will include but are not limited to:

- Swap
- Liquidity Pool
- Farming
- Staking
- Launchpad

We are loyal to our community and that will lead the way for our exponential growth. We will constantly scale this ecosystem so it may bring ever increasing interested parties to the RalphSwap.

CARROT:

Used for transaction fees in the RalphSwap and it will be used for governance in the decision-making process in the ecosystem. The Save Ralph platform and protocol aim to be an autonomous ecosystem that will be governed by Carrot token holders, who will be tasked with voting on governance proposals and also for buyback of Save Ralph Tokens.

The supply of Carrot Token will be limited, with only 100 million tokens on the market, the first carrots tokens will be distributed only to people who have participated in the Save Ralph Token presale and have remained in hold and with an immutable portfolio up to the date of the carrot airdrop.

SAVE RALPH FOR NFT:

Our platform will be used to create or “mint” NFTs with an extremely simple process that makes it accessible to those with little to no experience with NFTs. This allows artists and creatives to create and sell their digital products with zero barriers to entry while still benefiting from the security enabled by blockchain technology.

The entire NFT ecosystem is still fairly new, but Save Ralph is aiming to use part of the revenue to subsidize the first mint transaction (NFT creation transaction) for users, in addition to other business strategies to fuel the growth of the platform. The Save Ralph Token Project is a solution to the limitations faced by the intellectual property market, such as challenging licensing and paperwork requirements. NFTs instead represent an easily accessible alternative available to anyone with just a few clicks.

Our tokenomics, solid designed, technical updates and implementations plus the growth from our memes will solidify the platform strength and ultimately provide residual benefits to our community. We are confident that with our unified force, the power of our community and the Save Ralph Token we will be successful advancing the swap and the platform as a whole, so we can grow and reach new heights together.

WHY WE AIM FOR DECENTRALIZATION?

Innovation is the key to success. Centralization has been a requisite for all of our official structures included but not limited to educational, political and financial systems proving that this system is not always equal, fair or ethically distributed to the people in the society. There have been times in our history where this sort of internal structure played an important role, but in an age with the information and data of the world available at a single click is the perfect time to rethink.

Decentralization provides a trustless environment; users don't have to put trust in a central authority, there is less likely to be a single point of failure, less censorship and potential for network ownership alignment.

Cryptocurrency itself comes from the idea of redefining wealth and how it can be acquired, which goes against traditional processes by its very nature. When the rules of the game are changed against their favor, they have no option but to comply regardless of the consequences.

WHY WE CHOOSE BINANCE SMART CHAIN? (BSC)

Binance Smart Chain has been expanding exponentially allowing users to do from tokens swap to decentralized money markets and NFT's, and enabling options to earn yield or simply to have fun.

BSC is a new blockchain with a full fledge-environment for developing high- performance decentralized applications. It was built for cross-chain compatibility with Binance Chain to ensure that users get the best of both worlds.

BSC boast smart contract functionality and compatibility with the Ethereum Virtual Machine (EVM). The design goal here is to introduce smart contracts with scalability into the crypto ecosystem. This makes it easy for developers to port our projects over from Ethereum, for users it means that applications like Meta-Mask can be easier to configured to work with BSC.

SAVE RALPH TOKEN ON EXCHANGES & MARKET CAPS:

Save Ralph Token is currently under pending application to be listed in the following exchanges & Market Cap:

- Gate.io
- CoinMarketCap (Officially Listed)
- PancakeSwap
- Coingecko
- Hotbit
- Binance

SAVE RALPH FOR NON-PROFITS ORGANIZATIONS:

Rabbits are adorable and defenseless animals that over time have been used as basis for both medical and cosmetic experiments threatening their life and their specie.

That is why Save Ralph have taken the task and duty of donating 3% of our token supply in order to support Non-Profit Rabbits Rescue Organizations, this contribution will help to the rescue, rehabilitation and adoption process for rabbits across the country, as well as purchasing supplies and veterinary care for our little friends.

Rest assure that when you invest in our project you are a few clicks away from helping rabbits in need.

MEET THE SAVE RALPH ECOSYSTEM TEAM:

Rolando A. Polanco

39 years old from Dominican Republic, Bachelor's Degree in Business Administration, self-thought trader and margin analyst in the crypto space, Bitcoin early adopter and holder, strong knowledge in cryptomining and blockchain, CEO and founder of Cryptoclub VIP.

Rolando is the CEO & founder of Save Ralph Ecosystem.

MEET SAVE RALPH TEAM

Vladimir Soto

30 years old from Merida Venezuela. Graduated in Bio- analysis ULA- Venezuela, more than 6 years of experience in online entrepreneurship, Creator of InverTec Community, Trader and Co-founder of CryptoClub Vip.

Vladimir is Co-founder & VP of Save Ralph Ecosystem.

MEET SAVE RALPH TEAM

Edwin J. Lobo

26 years old from Venezuela, Bachelor's Degree in Marketing, trader and fundamental analyst, risk advisor and analysis in cryptocurrencies, expert in managing social networks, early adopter & holder of Bitcoin, Co-founder of CryptoClub Vip and Dinero desde tu Casa.

Edwin is VP & Co-founder of Save Ralph Ecosystem.

MEET SAVE RALPH TEAM

Sergio Suarez

39 years old from Bolivia, Bachelor's degree in Industrial Engineering with a Master's Degree in Business Administration, Master's degree in Insurance Management and Technology, with more than 15 years of experience in Project Management and Administration, 5 years in E-commerce and 3 years in the cryptocurrency market, electronic currencies and decentralized money, trader and professional coach.

Sergio is the Chief Financial Officer of Save Ralph Ecosystem.

MEET SAVE RALPH TEAM

Jessica A. Salinas

29 years old from Miranda Venezuela, Bachelor's Degree in Computer Science & Accounting, more than 6 years of experience in crypto and blockchain, trader and margin analyst.

Jessica is Financial Planning Analyst at Save Ralph Ecosystem.

MEET SAVE RALPH TEAM

Juan Manuel Mogliati

20 years old from Argentina, Bachelor's Degree in Electronics, strong knowledge in soft matters and numbers, he started at the age of 15 in the world of entrepreneurship, seeking to stand out from the rest. He has managed various teams in his field, strong experience in blockchain technology, E-commerce, cryptocurrencies and technical analysis.

Juan is Financial Planning Analyst at Save Ralph Ecosystem.

MEET SAVE RALPH TEAM

Stephany C. Nunez Polanco

37 years old from Dominican Republic, has Bachelor's Degree in Business Administration, Master's Degree in Human Resources, Master's Degree in Project Management, Ex Bitcoin Miner & immutable holder since 2015, NFT & DeFi analyst, Fundamental Crypto Analyst, currently studying Full Stack Coding & Software Development at MIT (Massachusetts Institute of Technology).

Stephany is Business Development Manager at Save Ralph Ecosystem.

UNLOCKST

Luis Hernandez

37 years old from Venezuela Analyst - Programmer, Technical Services Stecnicoje, Application development using JavaScript, PHP, MySQL, Customer technical support, Full Stack Developer, Finanbest, Frontend and Backend development of applications with Typescript, JavaScript, PHP, MySQL, HTML5, Application testing, Troubleshooting, Artificial intelligence security bot developer

Luis is Cybersecurity Manager at Save Ralph Ecosystem.

MEET SAVE RALPH TEAM

Luis Tesorero

26 years old, from Venezuela, Web and Mobile programmer, Reactjs, React Native, Angular, PHP, Ruby on Rails, Python, ElectronJS, NodeJs languages & solidity developer with more than 5 years of experience in the construction of WebApps for large companies.

Luis is Software & web Developer at Save Ralph Ecosystem.
